Tap Reversed to Open

Angel Tarot

What Changed and Why?			
Screen or Element	Wireframe Expects	Mockup Shows	What I will change
Card Tinder instead of Swipe	Could draw one card after Tarot Details	Can draw many cards and details are shown afterwards	Cards are now in a CardSwiper() constructor.
Card Carousel instead of Summary	Summary comes after Tarot Details	Tarot Details can be toggled during Card Carousel	Make the cards in Card Carousel have GestureDetection to go to Tarot Detail
